

What is claimed is:

1. An anti-money-laundering system for providing risk assessment determinations at a branch of a financial institution, the anti-money-laundering system
5 comprising:
 - a risk assessor module for providing to an authorized user of the anti-money-laundering system, guidelines in identifying risks associated with the branch of the financial institution;
 - a policy builder module for recommending possible electronic and manual
10 countermeasures to the risks identified by the risk assessor module and for enabling the authorized user to select the countermeasures of his choice in order to create a policy for the branch of the financial institution;
 - an account opening due diligence module for providing detailed recommendations to the authorized user as to whether to allow an application for
15 account at the branch of the financial institution and for applying consistent implementation of the policy throughout the branch of the financial institution;
 - a transaction activity monitor module for receiving and monitoring transaction information including transaction information received by the account opening due diligence module, and for identifying suspicious patterns among the transactions at
20 the branch of the financial institution in order to provide a suspicious transaction activity report; and,
 - a case management and reporting module for tracking and identifying the detailed recommendations of the account opening due diligence module in order to provide continuous feedback to the authorized user about the effectiveness of the
25 system.
2. The anti-money-laundering system of claim 1, further comprising:
 - a staff training and policy management module for using the selected
30 countermeasures to develop customized training programs and to track compliance of users of the anti-money-laundering system.
3. The anti-money-laundering system of claim 1, wherein the risks identified by the risk assessor module include geographic location risk, types of customers served, and types of services offered by the financial institution.

4. The anti-money-laundering system of claim 1, wherein the policy builder module provides detailed support for the decision process in creating the policy.
- 5 5. The anti-money-laundering system of claim 1, wherein the authorized user can override for the branch of the financial institution, the detailed recommendations provided by the account opening due diligence module.
6. The anti-money-laundering system of claim 1, wherein the transaction
10 information received and monitored by the transaction activity monitor further includes historical data.
7. The anti-money-laundering system of claim 6, wherein the transaction
information received and monitored by the transaction activity monitor further
15 includes input from employees of the branch of the financial institution
8. The anti-money-laundering system of claim 5, wherein the case management and reporting module tracks and identifies the detailed recommendations of the account opening due diligence module that are overridden by the authorized user, and
20 updates the account opening due diligence module based on the override.
9. The system of claim 1, wherein the risks identified by the risk assessor module are used to determine the level of review applied against a selected operation or transaction.
25
10. The system of claim 9, wherein the level of review is selected from the group consisting of standard review or special review.
11. The system of claim 1, wherein the system is communicatively coupled to an
30 electronic network including a plurality of databases, and wherein the transaction activity monitor component gathers information stored on the plurality of databases in order to monitor the suspicious transactions, and processes the information to output the risk assessment guidelines and an explanation of the risk assessment guidelines.

12. A method for providing anti-money-laundering risk assessment determinations at a branch of a financial institution, the method comprising the steps of:
- identifying risk dimensions for the branch of a financial institution;
 - assigning numerical designations for the risk dimensions identified for the a
 - 5 branch of a financial institution;
 - identifying the type of financial transaction to be conducted at the branch of a financial institution;
 - determining whether the financial transaction to be conducted has a risk-related dimension;
 - 10 determining whether the numerical designation of at least a selected one of the identified risk dimensions for the financial transaction to be conducted exceeds a predetermined level, if the financial transaction to be conducted does have a risk-related dimension;
 - performing a special risk assessment procedure if the numerical designation of
 - 15 at least a selected one of the identified risk dimensions exceeds a predetermined level;
 - providing to an authorized user recommended guidelines for handling the financial transaction to be conducted, based on the special risk assessment procedure.
13. The method of claim 12, further including the step of:
- 20 performing a standard risk assessment procedure if the numerical designation of none of the identified risk dimensions exceeds a predetermined level.
14. The method of claim 12, wherein the risk dimensions include:
- a first risk dimension representing the risks due to the location of the branch of
 - 25 the financial institution;
 - a second risk dimension representing the risks due to selected services offered by the branch of the financial institution;
 - a third risk dimension representing the risks due to the nature of the customers served by the branch of the financial institution; and,
 - 30 a fourth risk dimension representing the risks due to the jurisdictions served by the financial institution.

15. The method of claim 14, wherein the risk dimensions are based on local laws, regulations, historical data, and other information that is specific to the branch of the financial institution
- 5 16. The method of claim 14, wherein each of the selected services has associated accounts, each of the associated accounts having a risk rating and risk exposure rating, and wherein each risk dimension is based on the risk rating and risk exposure rating of all associated accounts of all of the selected services.
- 10 17. The method of claim 16, wherein the second and third risk dimensions are based on data collected from the selected services.
18. The method of claim 14, further comprising the step of:
performing a standard risk assessment procedure if it is determined that the
15 financial transaction to be conducted does not have a risk-related dimension, wherein the standard risk assessment is based on the average of the numerical designation for all of the risks.
19. The method of claim 14, wherein the type of financial transaction to be
20 conducted at the branch of a financial institution includes opening an account, and wherein the risk dimension for the account opening is based on the risk due to the nature of the customers served by the branch of the financial institution.
20. The method of claim 19, wherein the nature of the customers served by the
25 branch of the financial institution includes high-risk clientele, and wherein the special risk assessment procedure is performed for the account opening.
21. The method of claim 13, wherein when it is determined to perform a special risk assessment procedure for a financial transaction, the special risk assessment
30 procedure is performed semi-annually, and wherein when it is determined to perform a standard risk assessment procedure for a financial transaction, the standard risk assessment procedure is performed annually.
22. The method of claim 12, further including the step of:

overriding by an authorized user the recommended guidelines for handling the financial transaction to be conducted.

23. The method of claim 22, wherein the authorized user provides alternative
- 5 guidelines after the step of overriding the recommended guidelines for handling the financial transaction to be conducted.
